Clear browsing data - Edge

Note

1. Browsing：

The browsing history, including visited websites, dates, and times.

2. Download history：

The list of downloaded files from the internet will be cleared, but this action will not delete the actual files you have downloaded.

3. Cookies and other site data：

The website stores information on your computer for remembering preference settings (login information or location).
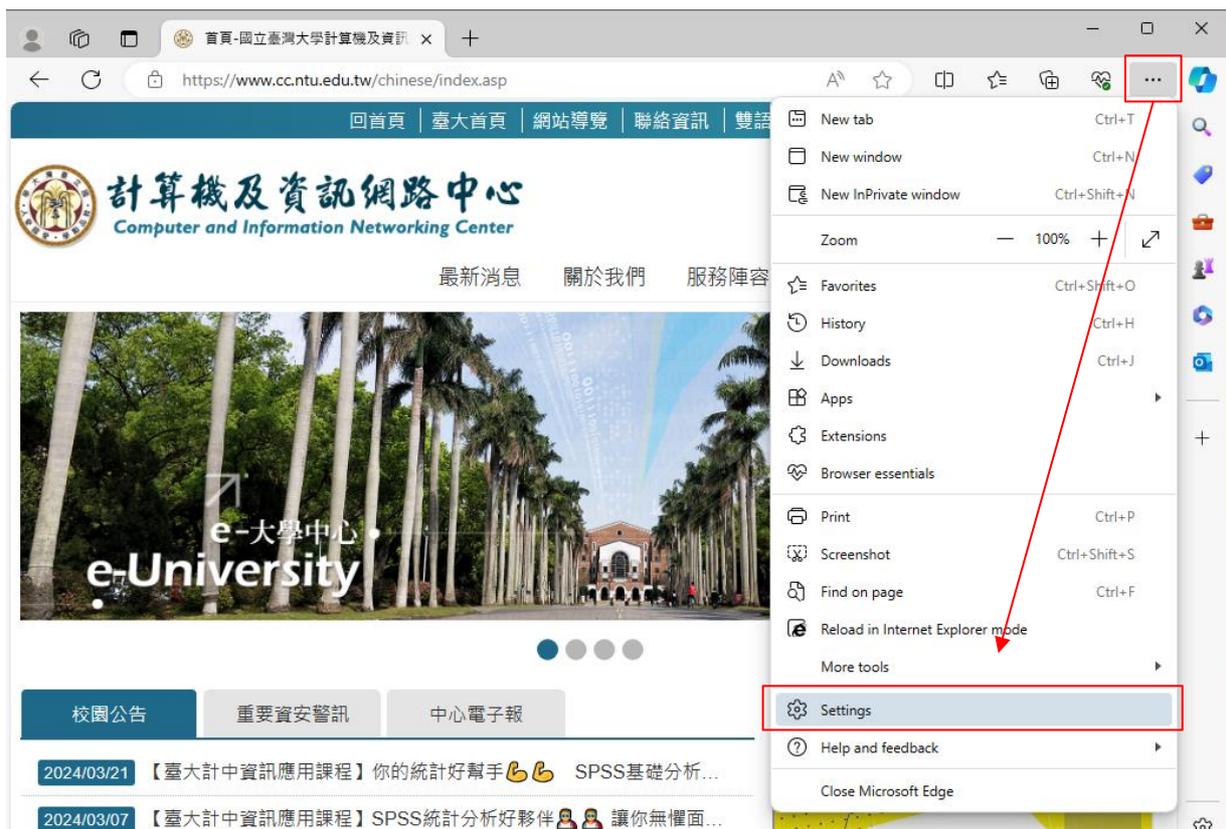

4. Cached images and files：

The browser uses copies of web pages, images, and other media content stored on the computer to speed up loading when visiting these websites again.
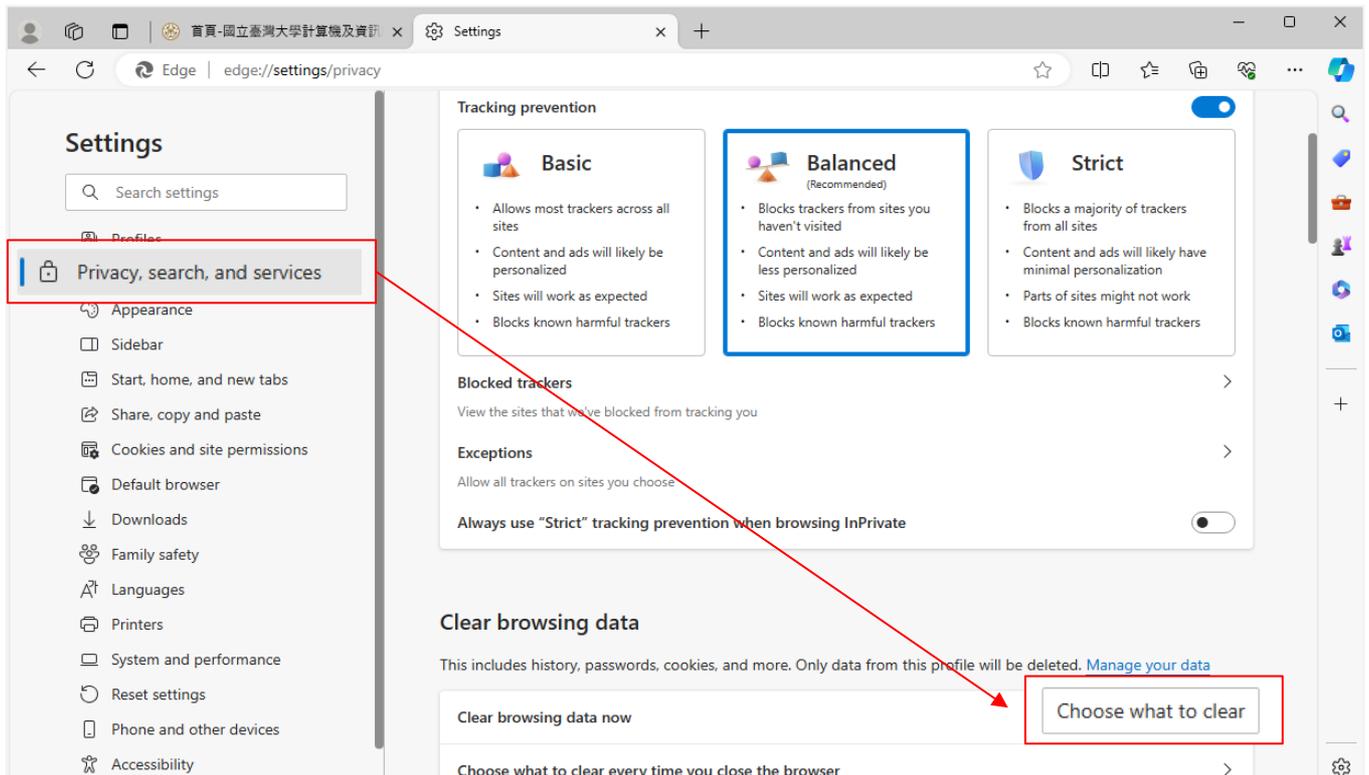

5. Passwords：

Stored passwords for websites.

Steps

1. Open Chrome browser, Click【⋯】,then click【Settings】.

2. Click【Privacy and security】,then click【Clear browsing data】.

3. Pop up the window, check the items to clear according to personal preferences, then click【Clear now】.
